ENVIRONMENT STUDY ABROAD

Today's global employment environment demands graduates who have an awareness and sensitivity to cultural differences. By studying abroad, you can develop these skills and then use your international experience to stand out when meeting with future employers. Our study abroad partnerships and business relationships in the Asia Pacific region offer environment students the opportunity to attend some of the best universities and intern with organizations ideal for your major. Check it out for yourself.

PROGRAM HIGHLIGHTS

- Take courses at prestigious universities in Australia, New Zealand, South Korea and Southeast Asia
- Build your resume with an internship available during the summer and semester programs or as a semester – internship abroad combination
- Benefit from the expertise of our on-site resident directors who assist you throughout your time abroad
- Be immersed in your new host country with cultural excursions and activities designed to enhance your cultural understanding
- Adjust to the local culture with our in-depth on-site orientation programs

SEMESTER

Environment courses are available at our partner universities throughout Australia, New Zealand, South Korea, and Southeast Asia. See reverse side for a list of universities offering environment disciplines.

INTERNSHIPS

The Australia, New Zealand, and Thailand Internship Programs give students and recent college graduates an opportunity to work with some of this region's leading organizations and ensure you receive training compatible with your employment and/or educational history. Internships are available part time during a semester abroad program or full time during the summer or regular semesters.

TAYLOR GUASTELLA
CHATHAM UNIVERSITY

My Conservation Ecology class was a requirement for those majoring in environmental or biological studies at the university, and therefore had very few Americans and mostly Australians in the course. It also certainly wasn't an easy class. These are the two reasons why I loved this course. The course was focused on the conservation of Australian species and I feel it was very beneficial. I learned a lot about Australian history, ecology, and attitude towards conservation. Because of the extensive workload it was really easy to bond with other students and talk about the course expectations. As part of the course, we went on an overnight trip to a field station owned by the university. It was unlike any field trip I had ever had in the US. The overnight field trip also helped to further enhance my friendships with classmates.

ABOUT TEAN

At The Education Abroad Network, we love helping students make "studying abroad a reality." We've been running study-based programs in the Asia Pacific region since 1995, and while we certainly have grown, we are still an organization that is responsive and flexible to the needs of students. With our programs you will receive individualized pre-departure consultation, qualified and experienced on-site resident directors and high-quality accommodations, as well as a range of exclusive program options designed to promote integration into your host culture. The Education Abroad Network is prepared to make your experience abroad the most amazing adventure of your life.
