- Sport and Leisure Studies

## Looking to learn more about the cultural contexts of health and health care?

Courses that expose you to a different health care system can lead to a greater understanding of how people's cultural and social backgrounds impact their perspectives on health and well-being.

Whether you are looking for summer programs specifically designed around health and exercise science coursework and experiences, or you are seeking courses through our host university partners that introduce health issues from a different cultural perspective, TEAN has a suite of programs designed to meet your academic goals.

Are you looking for specific courses? Visit [teanabroad.org/course-finder](https://teanabroad.org/course-finder) and we can help you find the program that meets your academic goals and course needs.

### Get hands-on experience abroad

An international internship through TEAN can help you stand out in the increasingly competitive job market. Available for a variety of majors, we offer full-time internships (in-person or online!) or add a part-time internship alongside your courses.

Discover internship opportunities available by visiting [teanabroad.org/internships](https://teanabroad.org/internships).

#### COURSES IN ENGLISH UNLESS OTHERWISE NOTED

The following list and chart represents only a sampling of available TEAN programs. To get more information on the programs shown, as well as information on all other program options, go to [teanabroad.org/program-finder](https://teanabroad.org/program-finder).

## Health & Exercise Science
